MEME-R: Meme Retrieval

Xabier Lahuerta, Murali Kondragunta and Ruan Chaves IXA NLP Group / University of the Basque Country, Donostia, Basque Country {xlahuerta001, mkondragunta001, rchaves003}@ikasle.ehu.eus

We propose to build a meme retrieval system which works in both directions – 1. retrieve an image when given context 2. retrieve a caption given an image.

- + The system works on already popular memes.
- For not so popular memes, the system takes the literal meaning i.e. focuses on the entities in query/image.
